

THIS EMPLOYEE WORKS
BEST UNDER PRESSURE

FG Pressure filters

Filtration Group Industrial has developed a wide range of pressure filters for use in hydraulic systems, lubrication oil systems and test benches, which ensure long-term cleanliness of liquids and oils. A robust housing also withstands high operating pressure, and the flow-optimized designs ensure maximum performance. With an extensive product portfolio that is continuously developed in line with system requirements, Filtration Group Industrial covers a wide range of application scenarios.

THIS EMPLOYEE WORKS BEST UNDER PRESSURE

FG Pressure Filters

The pressure filters from Filtration Group Industrial are suitable for countless applications, including line filters, flange-mounted filters, spin-on filters and filters in intermediate plate design. Filtration Group Industrial can also offer different connection threads, flange types and filter head shape options.

FG Pressure filters are available as full or partial flow filters for various pressure levels:

- Low pressure filters up to 60 bar
- Medium pressure filters up to 210 bar
- High pressure filters up to 450 bar

Additional options are available as full or partial flow filters for various pressure levels.
