Aftermarket Spare Parts Bilgewater Deoiling

A PARTNERSHIP BASED ON RESPONSIBILITY

TOGETHER IN COOPERATION

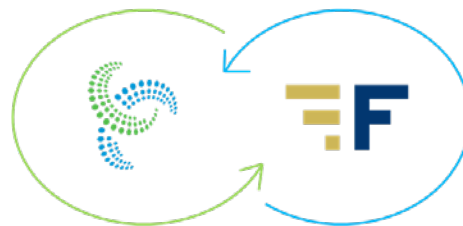

Since 01 January 2022 FILCOM GmbH is an authorised cooperation partner for the After-market Bilgewater Deoiling for Filtration Group GmbH, headquartered in Hamburg. The portfolio of FILCOM GmbH includes in addition to original spare parts for FG bilgewater deoilers as well as filtration and separation solutions around the marine as well as the complete ship operating technology. A sophisticated logistics concept sort for a safe, efficient and fast supply of spare parts. The cooperation is the perfect interplay of expertise, commitment and intentiveness.

SPARE PARTS PORTFOLIO FOR BILGEWATER DEOILING

So that everthing runs as you want it to: The permanent availability and efficiency of deoiling systems is the key to high productivity and performance of your plants. The FILCOM GmbH spare parts portfolio includes original parts from the manufacturer as well as a sophisticated logistics concept for safe, efficient and fast spare parts supply.

Our filter elements for replacement requirements are manufactured according to the same strict quality criteria as for original equipment. The result: **more safety, more economy and more performance for you.**

THE POTENTIATION OF STRENGTHS IS THE PLUS FOR THE CUSTOMER

The cooperation between FILCOM GmbH and Filtration Group Industrial combines the professional competence and the wide range of products for the supply of spare parts in the field of bilge water deoiling of two companies that develop optimal solutions for their customers in their respective special fields. First-class quality, selection, competence and a large stock of spare parts and filters for bilgewater separators complement both companies to form **a filter professional for the shipping industry.**

The declared aim of the partners is to provide efficient spare parts solutions that reduce operating and repair costs for ships and thus have a positive impact on productivity and operational safety.

A FINE THING FOR MARITIME ENVIRONMENTAL PROTECTION

Original manufacturer spare parts for use in efficient Filtration Group separation systems for bilgewater deoiling in shipping and on offshore platforms are an important guarantee for maritime environmental protection.

Bilgewater is produced by leakages, condensation and various cleaning processes.

FILCOM GmbH is the specialist for high-performance original spare parts for FG bilgewater deoilers in shipping. Especially when it comes to economic efficiency and environmental protection, the demands of the shipping industry are increasing. Therefore, trust in the high quality standards of FILCOM GmbH and benefit from the extensive stock of coalescers and spare parts for bilgewater separators worldwide.

We offer the following spare parts for bilgewater separators:

* Service Kits

- * Filter elements
 - Coalescer elements
 - Emulsion breaker
 - Filter coalescer
 - Filter cartridges
 - Desiccant cartridges
 - Filter GWTB (Water Grade Meltblown Polypropylene)

* Spare parts
