

The BAFA support program

Efficient compressed air not only saves on consumption, but is also subsidized by the German government! Benefit from the government subsidy by investing in a new energy-efficient KAESER compressor.

EFFICIENCY PAYS OFF!

Invest in energy efficiency

Until the end of 2022, the German Federal Office of Economics and Export Control (BAFA) will continue to provide subsidies for the use of highly efficient cross-sectional technologies, including in the field of compressed air generation. In addition to the use of particularly economical compressors, this also applies to higher-level control systems, heat recovery and initial investments in ultrasonic measuring devices, as well as energy-related optimization of plants and processes.

BAFA funding procedure

1. Check if your project is eligible before investing.
2. Obtain a quote.
3. You can start implementing the measure immediately after submitting the application (receipt of confirmation) at your own financial risk. You no longer have to wait for the grant notification.
4. Ordering the plant.
5. After receipt of the grant notification, the operational installation of the plant takes 24 months.
6. The proof of use, including all required documents, must be submitted to BAFA no later than three months after the end of the grant period.

Promotion features

Eligible are:

- Companies:
Up to 250 employees + annual sales up to 50 million Euro or annual balance sheet 43 million Euro → **up to 40 % subsidy**
From 250 employees → **30 % subsidy**
- New and replacement investments of a screw compressor
- Installation of a higher-level control system
- Installation of a heat recovery system
