

Technology for highest efficiency

From filter media to dedusting modules: Solution provider for perfect filtration performance

Filtration Group Industrial has always been far ahead of the rest in terms of development, striving to always set new standards for our customers. Today, our innovative filtration solutions continue to play a decisive role for ensuring uninterrupted operations and efficient production processes.

TECHNOLOGY FOR HIGHEST EFFICIENCY

Solution provider for perfect filtration performance

With our comprehensive technical application expertise, we optimize the entire system - from filter media to filter elements and from specially developed cleaning units to differential pressure controlled filter controllers. Achieving the perfect combination of factors guarantees reliable, high-performing filtration devices with long service lives.

Your advantages

- High degree of separation performance
- Minimal pressure losses
- Good cleaning characteristics
- High durability
- Long filtration service life
- Perfect pleat spacing

The scope of solutions we offer ranges from filter media, compact and pocket filters, washable filtration elements and filter cells to compact, robust and easily integrable mini dedusters to large-scale system solutions and filters for hot gas filtration or filtration in explosive areas - in accordance with the latest ATEX guidelines.

You also can set standards in terms of performance, durability and economy. We will be happy to advise you!
