

Everything from one hand

Filter systems are the guarantors of safe and economical operation of machines and plants. However, their performance can only be fully exploited if the design is right and the filter elements are changed at the right time. Professional filter management is therefore the basis for the use of efficient filter technology as an economic factor for increasing productivity.

This is what you should value

....when you choose a filtration partner. FILCOM GmbH is your competent partner for filtration technology. This is proven by our customer base. With more than 40,000 customers worldwide in 90 countries, we maintain long-standing partnerships based on mutual trust and have been working together for over 21 years.

Everthing from one hand!

With us you are on the safe side!

High-quality industrial filters from Filtration Group Industrial ensure safe and economical operation worldwide - in machines and plants. There is hardly an industry that could do without innovative solutions and services. Process and production reliability, availability and increased productivity are the top priorities everywhere. That is why FILCOM offers its customers comprehensive services in all fields of filtration expertise. FILCOM offers a plus in performance: for more functionality, more safety, more reliability and economic efficiency.

FILCOM points!

This is something you have value when choosing a filtration partner:

We offer:

- The **FILCOM logistics concept** ensures efficient, fast and continuous supply of spare parts in the field of filtration technology
- Thanks to **FILCOM's analysis and consulting competence** we offer you more safety, more efficiency and more performance. We recommend to you not the product we have but the product that best suits to you
- We provide you with optimization recommendations for you and also analyze problems directly on site, in order to offer you an optimal solution tailored to your needs
- You will receive **customized supply and spare parts packages** for existing applications and centrally supplied by us.
- For over 20 years, we have been solving problems, optimizing processes and save our customers and partners money in their production. Since 2012 we are **official premium partner** of Filtration Group Industrial.
- We rely on products from renowned manufacturers. About **25,000 quality items** in our online store ensure that every customer finds exactly the product that meets his or her needs.

Our services

In cooperation with our partner Filtration Group Industrial, we can perform a variety of tests for you to assess filtration efficiency, such as separation efficiency, dirt-holding capacity and filter element service life.

- Simple oil sample counting according to ISO 4406 (1999) and AS 4059
- Gravimetric analysis according to ISO 4405
- Microscopic evaluation of the dirt type and photographic documentation
- Examination for used filter elements from hydraulic circuits according to DIN 65669-1
- Water and emulsion analysis (sieve analysis)
- Determination of the water content of an oil sample according to Karl Fischer
- Determination of the viscosity of an oil sample
- Determination of the performance data of hydraulic filter elements according to ISO 16889 (multipass test) and much more
