

## Dust filter cartridge

### 328 NZC

Ø 328 mm

#### 1. Features

Star-pleated Filtration Group dust cartridges are used to separate dust from gases. Dusty air or gas impinged to the outside of the cartridges and the cleaned airflow exits at the top. The retained dust can be cleaned with a rotating wing by means of a cleaning pulse or by jet pulse.

Regular and extensive performance testing of all materials used in production is the key to the consistently high quality of Filtration Group dust cartridges. Additional applications tests are carried out both on the test stands in our own development laboratory and on the customer's site. The results of these tests form the backbone of innovative products, mature production methods and unmatched operational reliability.

#### Characteristics

- High separation efficiency
- Uniform pleat distribution
- Reliable operation
- Large filter surface in a very small space
- Optimised filter materials
- Installation on the clean side
- Worldwide sales

## 2. Technical Data

### Material

**Inner core:** Galvanized steel (standard)  
or stainless steel V4A - AISI 316

**End caps:** Galvanized steel (standard)  
or stainless steel V4A - AISI 316

**Seal:** PUR soft material

**Filter material:** Ti 07/1 - Electrostatical conductive  
polyester Fleece with PTFE membrane  
Ti 08 - Electrostatical conductive  
polyester fleece  
Ti 15 - polyester fleece  
Ti 19/2 - Cellulose/polyester carrier with  
PP meltblown  
Ti 70 - Cellulose with 30 % polyester fibres  
Other filter materials on request

### Cleaning

**Nozzle:** Rotating wing RLD Rein  
or multi-jet nozzle G1

**Cleaning pressure:** 3 bar to 4 bar (max. 4.5 bar)  
or 5 bar to 6 bar

**Differential pressure:** max. 15 mbar

Technical data is subject to change without notice!

## 3. Order numbers

| Order numbers | Type designation       | Length L** [mm] | Filter material | Filter surface [m²] | max. volume flow*** [m³/h] | Max. operating temperature [°C] | electrostatical conductive |
|---------------|------------------------|-----------------|-----------------|---------------------|----------------------------|---------------------------------|----------------------------|
| 78386948      | 852 781 Ti 07-7.5      | 600             | Ti 07/1         | 7.5                 | 750                        | 80                              | yes                        |
| 79394172      | 852 781 Ti 07-7.5 V4A* |                 |                 |                     |                            |                                 |                            |
| 78361511      | 852 781 Ti 08-10       |                 | Ti 08           | 10                  |                            |                                 | no                         |
| 77938046      | 852 781 Ti 15-10       |                 | Ti 15           |                     |                            |                                 |                            |
| 79354507      | 852 781 Ti 19-7.5      |                 | Ti 19/2         | 7.5                 |                            |                                 |                            |
| 78359788      | 852 781 Ti 70-13       |                 | Ti 70           | 13                  |                            |                                 |                            |
| 79355587      | 852 781 Ti 15-10 Band  |                 | Ti 15           | 10                  |                            |                                 | no                         |
| 78387920      | 852 781 Ti 19-7.5 Band |                 | Ti 19/2         | 7.5                 |                            |                                 |                            |

\* Version made of stainless steel V4A

\*\* Other cartridge lengths available on request

\*\*\* These values may vary depending on the nature of the dust and the composition of the gas.

## 4. Installation

The dust removal cartridges (diameter: 328 mm) are fastened to the filter plate on the clean air side by means of retainers. A hole with a diameter of 330 mm must be drilled in the filter plate.

## 5. Accessories

| Order number | Designation                        |
|--------------|------------------------------------|
| 79356734     | Multi-jet nozzle MJD-32 00 Rein A1 |
| 78296758     | Rotating wing RLD-32 08 Rein A1    |
| 78296857     | Rotating wing RLD-32 06 Rein V1    |

## 6. Cleaning

Two cleaning systems are available for dust filter cartridges with a diameter of 328 mm

### Filtration Group multi-jet nozzle

The optimised geometry of the multi-jet nozzle guarantees excellent cleaning results with a significantly lower noise level. The multi-jet nozzle is available from Filtration Group in aluminium or stainless steel. It can also be purchased as part of the Filtration Group MJD cleaning unit, comprising the nozzle, a tripod and various small assembly components. The stirrup maintains an optimum distance from the cartridge to ensure maximum cleaning efficiency.

### Filtration Group rotating wing

The dam plate closes during cleaning and the rotating wing begins to turn. The large number of compressed air jets that are discharged from the wing elements guarantee gentle, uniform cleaning over the complete cartridge length. The simultaneous vibratory movement in the pleats generates a significant improvement in cleaning efficiency, particularly with critical dusts. Each pleat is cleaned several times over. The filter life is optimised as a result of the rotating wing.

## 7. Design

Please contact us for detailed technical information, any open questions and for general expert advice. Completion of the relevant questionnaire would facilitate in the coordination of all important parameters.

Comprehensive documentation on our product range, cleaning units and cartridges can be provided.
